Warranty Terms

1. LEVANA products are guaranteed for a period of one year from the date of purchase against defects in workmanship and materials. This warranty is limited to the repair, replacement or refund of the purchase price at LEVANA's option.
2. This warranty becomes void if the product shows evidence of having been misused, mishandled or tampered with contrary to the applicable instruction manual.
3. Routine cleaning, normal cosmetic and mechanical wear and tear are not covered under the terms of this warranty.
4. The warranty expressly provided for herein is the sole warranty provided in connection with the product itself and no other warranty, expressed or implied is provided. LEVANA assumes no responsibilities for any other claims not specifically mentioned in this warranty.
5. This warranty does not cover the shipping cost, insurance or any other incidental charges.
6. You MUST call LEVANA before sending any product back for repair. You will be sent a Return Authorization form with return instructions. When returning the product for warranty service, please pack it carefully in the original box with all supplied accessories, and enclose your original receipt or copy, and a brief explanation of the problem (include RA #).
7. This warranty is valid only in Canada and the continental U.S.
8. This warranty cannot be re-issued.

INTRODUCTION

Thank-you for your purchase of the Levana ClearVu® Digital Video Monitor. Using advanced digital 2.4GHz ClearVu® technology, it enables you to transmit picture and sound signals wirelessly up to 450 feet away! We know that you will be pleased with the quality and features of your new baby monitor.

WHAT'S INCLUDED

- Baby Monitor
- Camera
- Camera Mount
- Charging Base
- 2 x Power Adapters
- 1 x Lithium Ion Battery for Monitor
- User's Manual

OPTIONAL ACCESSORIES

Extra Camera: LV-TW301-C

This system supports up to 3 additional cameras!

Advanced ClearVu® Digital Technology

Feel free to take the monitor with you around the house and even outside! ClearVu Technology ensures that you will always see and hear with perfect clarity and the signal remains strong up to 450 feet away.

Rechargeable Monitor

When you're not on the move simply put your monitor on its base to recharge – no batteries required! Enjoy up to 4 hours of continuous audio and video monitoring with a fully charged monitor.

Automatic Night Vision

The built-in night vision allows you to see your child, even in complete darkness. When the lights go down the system automatically adjusts to the level of light. With 10 ft of night vision range, the camera can be placed anywhere in your child's room while displaying a precise image on your monitor.

Color Changing Night Light

The color changing, built-in night light displays a calming light show, soothing your little one to sleep. This beneficial feature turns on automatically when the room gets dark and can be manually turned off once your child is asleep.

Advanced ClearVu® Wireless Monitor

The handheld video monitor is wireless, which means that it can travel with you. See and hear your child while you pick-up your mail or while you clean the downstairs playroom. With a signal that reaches up to 450 ft you have the freedom to multi-task with peace of mind.

LCD on/off Switch

Conserve the life of your monitor and still hear everything your baby is doing by turning off the LCD display and only using the audio function.

Expands to Suit Your Needs

If you have more than one child to monitor or your child is mobile, monitoring multiple areas of your home is important. This system can support up to three additional cameras, making it possible to watch your baby wherever he or she wanders.

24/7 Lifetime Live Customer Support

Our customer support team can be reached by phone 24/7 or by email and live web chat services, so you always have access to an expert.

Use this button to add more cameras or re-pair any camera which is not connected
- 11. Camera/Voice Activation Switch**
Set the camera to always transmit picture and sound, or set to AUTO and only transmit when sound is heard

INSTALLATION

Installing AC Adapter for the Camera

1. Install the plug of the included AC adapter into the 6V DC input of the camera.
2. Plug the AC adapter into a standard AC power outlet.
3. Switch ON the camera with the ON/OFF switch on the bottom of the camera.
4. The power indicator on the front of the camera will be illuminated red.

Note: Use only the AC adapters and rechargeable batteries supplied with this package. Using improper power sources may cause the unit to malfunction, cause harm to yourself or others, or void the manufacturer warranty.

Installing the Rechargeable Battery and Charging the Monitor

1. To install the rechargeable battery, remove the battery compartment cover on the back of the monitor, and place the battery in so the metal charging connectors are touching.
2. Replace the battery compartment cover.
3. Install the plug of the included AC adapter into the 6V DC input of the charging base.
4. Plug the AC adapter into a standard AC power outlet.
5. Set the monitor down on the charging base so that the metal connections are touching.
6. The charging indicator on the front of the monitor will be illuminated red.
7. Once the monitor is done charging, the charging indicator will be illuminated green.

CAMERA OPERATION

Power ON/OFF Switch

1. Use the power ON/OFF switch on the bottom of the camera to turn on the camera and transmit video and sound.

CAMERA OPERATION

Voice Activated Camera (Camera/Auto Switch)

To Activate

1. Slide the CAMERA/AUTO switch on the bottom of the camera to the AUTO position.
2. When the sound level of the baby and surroundings are above the preset level, the camera will transmit the image and sounds to the monitor.
3. When the sound level of the baby and surroundings are below the preset level, transmission will be shut off and no picture or sound will be transmitted.

Note: This is a good option to choose to save battery power on your LCD monitor.

To Deactivate

1. Slide the CAMERA/AUTO switch on the bottom of the camera to the CAMERA position.
2. Choosing the CAMERA option will transmit the video and sound continuously until you turn the camera or monitor OFF.

Color Changing Night Light

To Activate/Deactivate

1. Slide the OFF/AUTO/ON switch on the bottom of the camera to the ON position, the camera will continuously illuminate the night light, changing colors red, green and blue.
2. Slide the OFF/AUTO/ON switch to the OFF position to turn the night light off completely.

To Turn on Voice Activated Night Light

1. Slide the OFF/AUTO/ON switch on the bottom of the camera to the AUTO position.
2. The night light will illuminate when the noise level is above the preset level, and automatically shut off when the noise level is below the preset noise level.

Automatic Night Vision

- The infrared night vision of the camera allows you to see up to ten feet in complete darkness.
- The night vision of the camera turns on automatically when the sensor on the back of the camera senses that the light level in the room is too low to view. Avoid placing blankets or objects that would cover the back of the camera to avoid the night vision function turning on at incorrect times of the day

MONITOR OPERATION

Power ON/LCD OFF/OFF Switch

1. Slide the Power ON/LCD OFF/OFF switch to the ON position to turn the monitor ON, view the video, and hear all sounds continuously.
2. Slide the Power ON/LCD OFF/OFF switch to the LCD OFF position to turn the LCD screen OFF. In this setting you will still hear all sounds but the video will not transmit. This is a good setting to save battery power for the monitor.
3. Slide the Power ON/LCD OFF/OFF switch to the OFF position to turn the monitor OFF, you will not receive any video or sound.

Channel Selection

- The included monitor and camera will automatically be paired to channel 1
 - This system allows for four cameras total to be connected to one monitor, you will have to pair additional cameras to other channels. Please see the section on Pairing Cameras on page 13
1. To change the camera channel being viewed, slide the channel selection switch on the back of the monitor to the channel you wish to view: 1, 2, 3, or 4.
 2. You can also choose AUTO with the channel selection switch, this function will cycle through all of the channels you have connected to cameras.

Volume Control

1. Press the "+" and "-" buttons on the left side of the front panel to increase and decrease the volume of the monitor.

LCD Brightness Control

1. Press the "+" and "-" buttons on the right side of the front panel to increase and decrease the brightness of the video on the monitor.

Reset Button

1. Press the RESET button on the back of the monitor to return the system to its original manufacturer settings.

PAIRING CAMERAS

- This monitor has already been paired with the camera. You will need a pin or small object to press the pair button to connect additional cameras

To Pair Cameras

- Turn the monitor OFF using the ON/LCD OFF/OFF switch.
- Press and hold the "+" brightness button on the right side of the front panel, and switch the ON/LCD OFF/OFF switch to the ON position.
- The monitor will turn ON and the pairing screen will be shown.

- Once you see the screen above, **switch on the camera you would like to pair**. Using a pin or small object, press the pair button through the small opening on the bottom of the camera.
- The power LED on the camera will begin blinking when you have successfully pressed the pair button.
- The monitor and camera will now connect automatically, and the screen will show "Cam1 OK!"

- Once you pair Cam 1, the monitor will prompt you to pair Cam 2, Cam 3, and Cam 4.
- Repeat steps 4 through 6 to connect up to three additional cameras.
- Once you have connected the number of cameras you would like, turn the monitor OFF and ON again to resume normal operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help
- FCC Label Compliance Statement
- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference
 - (2) This device must accept any interference received, including interference that may cause undesired operation

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

SAFETY INSTRUCTIONS

Read and Keep Instructions: All the safety and operating instructions should be read before the video baby monitor is operated.

Water and Moisture: This product is designed for indoor use only. The unit should not be exposed to rain, moisture, dripping or splashing. No objects filled with liquid should be placed on top of, or beside the product, such as a glass or vase. This item should not be used near water.

Ventilation: This baby monitor should not be used on a bed, sofa, rug or similar surface that may block the ventilation openings, or be placed in an enclosed area, such as a bookcase or drawer that may impede air flow.

Keep Away from Sources of Heat: This unit should not be exposed to direct heat sources such as a candle, fireplace, radiator, heat register, stove or other appliance that emits heat. The unit should not be left in direct sunlight.

Power Source: This unit should only be used with the AC power adapters included in this package (rated 6V 800mA)

Non-Use Periods: Always unplug the AC adapters from the wall outlets during long periods of non-use.

Damage Requiring Service: This unit should be serviced by qualified personnel only when:

- a. Objects have fallen or liquid has been spilled into the product
- b. The units have been exposed to rain
- c. The units do not appear to operate normally or exhibits a distinct change in performance
- d. The units have been dropped or the enclosure damaged

Caution: This product cannot replace responsible adult supervision of a child. You should personally check your child's activity at regular intervals.

STATEMENT ON REGULATION

These units are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Operation with non-approved equipment or unshielded cables is likely to result in interference to radio or TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.
